

Issues

Is your employee onboarding process slow and manual?

Do you have a way for users to securely request their own access and assets?

Do you know who has what access across all of your sensitive system?

Solutions

**IDENTITY™
ENFORCER**

**Increases
Efficiency**
Workflow
Enabled Access Request

Want your users to get the access they need without cumbersome manual processes? Make it self-service. With Avatier Identity Enforcer, end users, or their managers request the access and assets they need through an easy-to-use online "IT store". A dynamically generated approval workflow streamlines the approvals and provisioning, without cumbersome workflow programming. Identity Enforcer also provides the controls needed for to satisfy internal audit and regulatory compliance.

Identity Enforcer's self-service model organizes roles, privileges and assets to mirror business processes. End-users simply "shop" for the resources they need for their job functions. The programming-free workflow engine, automatically generates the required approval process. The system deploys quickly.

Make your user provisioning self-service with Avatier Identity Enforcer!

**IDENTITY™
ANALYZER**

**Increases
Awareness**
Assist
in ID Mapping and Role Mining

Do you know who has what access across all of your systems? Now you do! Identity Analyzer gives you a complete view of all user accounts across your enterprise systems, regardless of your technical expertise.

Whether you are conducting an access health check or preparing to roll out a new identity management system, Identity Analyzer let's you see all of the user access in your environment. You can even check the status of accounts that have been disabled or deleted.

Identity Analyzer can be purchased in a bundle with other Avatier identity management solutions, or as a standalone product. It takes only a few hours to have it up and running in your environment.

Prepare for faster, smoother user provisioning and compliance software deployments with Avatier Identity Analyzer.
